

Transparency for more effective climate action

ICAT provides countries around the world with practical tools and tailored support to build the robust transparency frameworks needed for effective climate action

Why transparency

For countries to meet their commitments to the Paris Agreement, they need to have sound data and information systems in place.

These systems help design and implement strong, evidence-based policies and actions to address climate change.

How ICAT supports countries

ICAT works closely with its partner countries to develop policy-focused projects that develop the information systems and capacity required to improve the implementation, tracking, reporting and enhancement of their NDCs.

Direct Country Support

ICAT delivers hands-on support tailored to a country's needs and national priorities

The ICAT Toolbox

ICAT develops and deploys a suite of innovative and open-source tools and methodologies that help countries advance their transparency efforts

Regional Climate Action Transparency Hubs

ICAT establishes and runs regional hubs that build capacity at scale for climate action transparency

Knowledge sharing

ICAT actively strengthens a global community of practice through a variety of knowledge exchange activities and resources

Join ICAT

Provide critical support to helping 45+ countries achieve their climate targets while contributing to their national sustainable development goals.
